EXPERIENCE

Apr 2026 - Current
Mission Viejo, CA

FieldAI
Senior Software Engineer

- Lead development of dashboard for gas and thermal inspection missions conducted by autonomous robots
- Resolved severe latency experienced by gas inspection missions by reducing telemetry API payloads 100x (from 4MB to 40KB) and leveraging DBSCAN to cluster visualizations.

Sep 2025 - Mar 2026
El Segundo, CA

Smack Technologies
Product Engineer

- Deliver company’s first product, which generates predictive ISR plans. Secured a follow-up government contract following its successful demo.
- Serve as lead engineer on a fires planning product. Develop the project road map & onboard & manage a team of three software engineers.
- Integrate temporal, reducing latency by 6X and adding observability to workflows.

Jan 2020 - Oct 2024
Venice, CA

Google
Software Engineer III

- Create a self serve tool to reject and backfill feedback from problematic human raters. Used on tens of thousands of feedbacks as part of effort to improve data quality.
- Investigate EWOQ billing, resulting in a refactor with table-valued-functions & GoogleSQL tests plus the discovery & fix of a bug in task time computation, resulting in savings of over \$1.2 million a year
- Migrate authorization service APIs to support Zanzibar IAM authorization
- Develop evaluation details page for third party vendors.
- Perform backfill of rater employment records. Develop launch plan, validate changes via SQL queries, and update admin portal to support setting, updating, and validating the new field.
- Fix & improve team’s latency dashboard by adding filter options & timeseries charts
- Migrate EWOQ user details page from GWT to Angular Dart

Sep 2019 - Jan 2020
Santa Monica, CA

Cornerstone OnDemand, Inc
Software Engineer

- Support in beta release of point-in-time headcount reporting
- Add event tracking via Amplitude Analytics to analyze user behavior and improve prioritization of upcoming team projects.

EDUCATION

University of Michigan College of Engineering,
B.S.E. Computer Science
Graduation: April 2015

COMPUTER SKILLS

Front End Languages & Frameworks:

HTML, CSS, JavaScript, TypeScript, React, React Three Fiber, Angular, Vue.js, SolidJS, Dart, WebGL, Three.js

Back End Languages & Frameworks:

Node.js, GraphQL, C++, Python, Django, Java, PostgreSQL, DynamoDB

Tools:

Cursor, Claude Code, Git, Perforce, AWS, Unity3D, Colab, Jira, WordPress, Maya, Adobe Creative Suite

Other:

OOP, Design Patterns, Web Dev, Agile Dev, Game Dev, XR, 3D Graphics, Computer Vision, Digital Art

RECENT PROJECTS

Cubism.js

- Publish JS library for creating full-screen, 3D scrolling websites, composed of cubes

Cryptocurrency Bot

- Run AWS Lambda function to compare cryptocurrency prices across exchanges & text profitable arbitrage opportunities

Illusion Generator

- Program python script to generate image morphing optical illusions in Maya by utilizing perspective & linear algebra

INVOLVEMENT

Hacker Fund (Sep 2015 – Present)

- Mentor & judge hackathons
- Organized & ran remote STEAM camp for Compton Unified School District students
- Received 2021 Volunteer of the Year award
