| Nov 2016 – Sep 2018<br>Seattle, WA      | <b>Amazon Web Services (AWS)</b><br><b>Software Development Engineer I</b> <ul style="list-style-type: none"><li>Develop software for QuickSight, a new business intelligence (BI) product at AWS</li><li>Add new features including an AWS IoT Analytics data connector, dashboard co-ownership, email notifications, &amp; CloudTrail operational auditing.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

### EDUCATION

**University of Michigan College of Engineering,**  
B.S.E. Computer Science  
Graduation: April 2015

### COMPUTER SKILLS

**Front End Languages & Frameworks:**  
HTML, CSS, JavaScript, React, Angular, Vue.js, SolidJS, Dart, TypeScript, WebGL, Three.js  
**Back End Languages & Frameworks:**  
Node.js, GraphQL, C++, Python, Django, Java, PostgreSQL, DynamoDB  
**Tools:**  
Cursor, Git, Perforce, AWS, Unity3D, Colab, Jira, WordPress, Maya, Adobe Creative Suite  
**Other:**  
OOP, Design Patterns, Web Dev, Agile Dev, Game Dev, XR, 3D Graphics, Computer Vision, Digital Art

### RECENT PROJECTS

**Cubism.js**

- Publish JS library for creating full-screen, 3D scrolling websites, composed of cubes

**Cryptocurrency Bot**

- Run AWS Lambda function to compare cryptocurrency prices across exchanges & text profitable arbitrage opportunities

**Illusion Generator**

- Program python script to generate image morphing optical illusions in Maya by utilizing perspective & linear algebra

### INVOLVEMENT

**Hacker Fund (Sep 2015 – Present)**

- Mentor & judge hackathons
- Organized & ran remote STEAM camp for Compton Unified School District students
- Received 2021 Volunteer of the Year award
