EXPERIENCE

Sep 2025 - Current
El Segundo, CA

Smack Technologies
Product Engineer

- Deliver company’s first product, which generates predictive ISR plans. Secured a follow-up government contract following its successful demo.
- Serve as lead engineer on a COA generation product. Develop the project road map & onboard & manage a team of three software engineers.

Jan 2020 - Oct 2024
Venice, CA

Google
Software Engineer III

- Create a self serve tool to reject and backfill feedback from problematic human raters. Used on tens of thousands of feedbacks as part of effort to improve data quality.
- Investigate EWOQ billing, resulting in a refactor with table-valued-functions & GoogleSQL tests plus the discovery & fix of a bug in task time computation, resulting in savings of over \$1.2 million a year
- Migrate authorization service APIs to support Zanzibar IAM authorization
- Develop evaluation details page for third party vendors.
- Perform backfill of rater employment records. Develop launch plan, validate changes via SQL queries, and update admin portal to support setting, updating, and validating the new field.
- Fix & improve team’s latency dashboard by adding filter options & timeseries charts
- Migrate EWOQ user details page from GWT to Angular Dart

Sep 2019 - Jan 2020
Santa Monica, CA

Cornerstone OnDemand, Inc
Software Engineer

- Support in beta release of point-in-time headcount reporting

Nov 2018 – May 2019
Los Angeles, CA

Survios, Inc
Software Engineer

- Build Rise, a VR lobby, station management & customer reservation platform for physical arcades.

Nov 2016 – Sep 2018
Seattle, WA

Amazon Web Services (AWS)
Software Development Engineer I

- Develop software for QuickSight, a new business intelligence (BI) product at AWS
- Add new features including an AWS IoT Analytics data connector, dashboard co-ownership, email notifications, & CloudTrail operational auditing.
